

Subject: Front-end Developer Candidates Evaluation

Dear Team,

As part of our ongoing efforts to recruit new front-end developers, I am writing to provide my evaluation on the individuals i recently spoke with for the role.

1. **Name:** Benjamin Alamu

Contact Details: oluwaseunalamu@gmail.com / +2348103374289

Evaluation:

In my conversation with Benjamin, I discovered that he has hands-on experience in building various products, both in the finance and e-commerce sectors. This extensive experience positions him as a valuable asset to our team, as he doesn't come across as a newcomer. Benjamin demonstrated a solid understanding of the Vue/Nuxt.js framework and deployment methods. His proficiency suggests that he can seamlessly integrate into our projects and contribute his expertise to the company.

2. **Name:** Joseph Ohwonohwo

Contact Details: joseph.ohwonohwo@gmail.com / 07013099794

Evaluation:

Despite Joseph not having an extensive portfolio of projects, he exhibits a strong grasp of the fundamentals. His understanding of the basics suggests that he is poised to learn and adapt swiftly. Joseph brings experience with Vue.js to the table, indicating his capability to handle various aspects of our projects. While he may not have worked on numerous projects, I see considerable potential for growth in him. Joseph strikes me as an individual who is eager to work, continually improve himself, and contribute positively to the growth of the company.

Looking forward to your prompt response.

Best regards,

Success Ahon
Front-end team Lead
